Pump Station Pilot

Feature Highlights

1. All data is kept on the PSP itself and no third party site or Internet sites outside the unit is needed.

2. Standard unit comes with or without pump control capabilities.

3. Standard unit comes equipped to monitor 8 inputs in any combination of digital, analog, or pulse.

4. Unit sends SMS message or emails to whatever personnel needs to know of the problem.

5. Standard unit comes in a PVC cabinet with aluminum back plate.

6. All inputs and outputs on the I/O board are protected by relays so that if a piece of field equipment being monitored gets a short circuit, it will not damage the unit.

7. ROI on the unit is very quick due to the fact that you can spend a lot less time and gasoline cost by visiting the sites much less.

8. All data is logged and sent out at selectable intervals in CSV form by email.
